Attorneys for Defendants  
 SPHERION ATLANTIC ENTERPRISES LLC

UNITED STATES DISTRICT COURT  
 SOUTHERN DISTRICT OF CALIFORNIA

PHILIP J. MARTINET, Individually, On  
 Behalf of All Others Similarly Situated, and  
 on Behalf of the General Public,

Plaintiff,

v.

SPHERION ATLANTIC ENTERPRISES  
 LLC, a Delaware Limited Liability  
 Company; and DOES 1 through 50,  
 inclusive,

Defendant.

Case No. 07 CV 2178 W (AJB)

**DECLARATION OF JOAN L. ORZO IN  
 SUPPORT OF DEFENDANT'S  
 MOTION FOR A PROTECTIVE  
 ORDER UNDER FEDERAL RULE OF  
 CIVIL PROCEDURE 26(c)**

**Date: May 16, 2008**  
**Time: 10:00am**  
**Courtroom: A – First Floor**  
**Judge: Hon. Anthony J. Battaglia**

I, Joan L. Orzo, declare:

1. I am a human resources manager for Spherion Atlantic Enterprises LLC. I have personal knowledge of the facts set forth in this declaration and if called as a witness, I would and could testify to the truth of these matters.

2. I am employed by Spherion Atlantic Enterprises LLC and work out of Dallas, Texas. I have been employed by the company since 1992. I am currently a human resources manager for the staffing services unit of the company.

3. As a corporate human resources manger, I manage employee relations and support field operations throughout the company including Spherion Atlantic's staffing services operations in California. In that capacity, my current duties include providing management support and guidance on employee relations policies and procedures. I am familiar with

1 Spherion's business structure and with its business operations, policies, and practices in  
2 California. I am also generally familiar with the clientele and industries Spherion serves, and the  
3 manner in which Spherion conducts business in the United States and California.

4 4. Spherion is a staffing company that provides job assignments to thousands of  
5 individuals in California and throughout the United States and Canada. Spherion recruits and  
6 hires individuals and assigns them to businesses, government agencies, non-profit entities, and  
7 other organizations throughout the country under a variety of different contracts and service  
8 agreements. Spherion supplies recruits to almost every industry imaginable including retail,  
9 healthcare, construction, legal services, manufacturing, pharmaceuticals, commercial and  
10 residential real estate, insurance, mortgage and loan, automotive, plumbing, financial services  
11 and banking, securities, consumer credit, engineering, waste collection, education, public  
12 utilities, airline, cable and internet, media, business services, packaging and shipping, food  
13 services, beverage and wine, bottling, computers and electronics, entertainment and motion  
14 picture, transportation, travel and hotel, agriculture, marketing and advertising,  
15 telecommunications, publishing, internet, information technology, charitable and religious,  
16 military, county and city government, and numerous state agencies.

17 5. Spherion recruits provide a wide range of services including general labor and  
18 production work, administrative and office support, managerial and professional work, and  
19 skilled, technical and scientific work. Some recruits perform highly-paid professional services,  
20 others perform more general office/administrative support services, and yet others perform  
21 manual labor. Spherion recruits may support or supplement regular workforces; provide  
22 assistance in special work situations such as employee absences, skill shortages, and seasonal  
23 workloads; or perform special assignments or projects. Assignments or projects last anywhere  
24 from a few hours to multiple days, weeks, months, or even years.

25 6. The duties and working conditions of Spherion recruits vary according to the  
26 account and project to which they are assigned. Some flex employees are employed on a long-  
27 term basis. Other Spherion employees work far shorter assignments for many clients.

28 Spherion's full-time associates are not placed with other companies at all, but work for Spherion

1 directly and perform daily managerial or administrative tasks related to Spherion's internal  
2 operations.

3 7. Spherion has hundreds of offices throughout the United States with multiple  
4 offices in California. Some offices are operated by Spherion directly and service a number of  
5 clients in a particular area. Other offices are on the premises of a particular client's office, where  
6 Spherion only services that particular client. Yet other offices are run by franchisees or licensees  
7 of Spherion. Spherion licensees have and manage their own office employees, while Spherion  
8 provides support and management for temporary staff recruited and placed by the licensee.  
9 Spherion franchisees on the other hand manage and control both their on-site office staff as well  
10 as the temporary staff recruited and placed by the franchisee.

11 8. Although Spherion has general policies, many of Spherion's policies are  
12 customized or modified at the local branch offices or by the franchisees or licensees. These  
13 policies are further modified and customized for individual clients, their customers, and various  
14 projects. Actual procedures and practices vary widely from office to office, client to client, and  
15 project to project.

16 9. Spherion serves thousands of clients in California. Although Spherion has some  
17 longstanding clients, there is a high rate of attrition among a portion of Spherion's clientele as  
18 businesses and organizations come and go or sporadically use Spherion's services. Spherion's  
19 clientele and the assignments it recruits for changes on a daily basis.

20 10. Spherion has contractual agreements with many of its clients that govern the  
21 employment and working conditions of Spherion personnel. These contractual agreements often  
22 involve multiple parties when, for example, Spherion provides staffing for the customers of a  
23 client. Working conditions, procedures, and practices for Spherion personnel vary by client and  
24 client's customer and depend on the nature of the relationship between Spherion, its clients, and  
25 the clients' customers. Some clients require that their own procedures or their customers'  
26 procedures affecting employees be utilized, while others follow Spherion's general policies.

27 11. Spherion is a multifaceted business with a multi-layered organizational structure.  
28 Spherion has two primary business units/divisions – Staffing Services and Professional Services.

1 Recently Spherion has acquired several businesses and these units/divisions have splintered into  
2 multiple divisions or groups. Within the Staffing Services unit there are multiple employee  
3 classifications with hundreds of different job titles. Within each classification and job title there  
4 are employees performing a wide range of activities and duties in a variety of different industries  
5 for a variety of different clients. There are so many different types of jobs that Spherion recruits  
6 perform that their job titles often do not adequately describe their position in a meaningful way.  
7 The job duties of a Spherion employee are highly dependent on individual client and customer  
8 needs.

9 12. My understanding is that Plaintiff Philip Martinet's assignment and employment  
10 was very unique. Plaintiff was recruited by Spherion's Professional Services out of a branch  
11 office in San Diego. Plaintiff was recruited as a PC Technician.

12 13. Spherion recruits many individuals for special assignments that have unique  
13 duties, operations, and practices. For example, Spherion might recruit for an administrative or  
14 clerical position for a hospital in the healthcare industry. Typically a Client Services Supervisor  
15 ("CSS") at a local branch would recruit the individual. These types of assignments are often of a  
16 short duration - for one day to a couple of weeks. Branch personnel would act as the immediate  
17 supervisor, oversee the employee's assignment, and partner with the client in regard to  
18 the supervision and management on a flex employee's day-to-day performance. This type of  
19 employee would typically be subject to branch-specific policies, but the employee may also be  
20 subject to the client's individual practices and procedures. The nature of the employee's  
21 orientation and training and the type of documents given to the employee would depend on the  
22 duration of the assignment, the type of client, and nature of the project. Documentation related  
23 to the employee's assignment, hours, and working conditions would be primarily kept by  
24 Spherion at the local branch office. After completing his or her assignment, this employee may  
25 never work for Spherion again or may be reassigned to the same project, a similar project for a  
26 different client, or a dissimilar project for a different client in a different industry.

27 14. Another example would be a Spherion employee who is recruited for a customer  
28 service position for a call center in the consulting industry. This employee might be recruited by

1 Spherion personnel working on-site at the client's place of business. This type of assignment  
2 would typically last multiple weeks. Spherion's on-site personnel would act as the immediate  
3 supervisor and oversee the employee's assignment along with the client providing input on day-  
4 to-day performance. This type of employee would typically go through a site/client-specific  
5 orientation and would often be subject to customized policies and site-specific practices and  
6 procedures as dictated by the client. Documents related to the employee's assignment, hours,  
7 and working conditions may be kept by Spherion's on-site personnel or at the client's place of  
8 business.

9 15. The location of various employee handbooks, human resources documentation,  
10 and procedures varies from office to office, division to division, client to client, and project to  
11 project. For example, some personnel files are kept at the local branch office while others are  
12 kept on a specific worksite with a project or account manager. There have been thousands of  
13 different projects staffed by Spherion recruits over the last several years and gathering all the  
14 policies and procedures, employee handbooks, and other documents related to each project  
15 would be a gargantuan task that would involve hundreds of people and thousands of Spherion's  
16 clients. As further described below, the total man-hour expenditure would be 24,800 hours and  
17 the total expense would exceed \$550,000.

18 16. I have reviewed plaintiff's first set of interrogatories and document requests and  
19 am familiar with the requests plaintiff is making. Interrogatories Number 4, 5, 6, and 7 ask  
20 defendant to identify all differences in its meal break policies for employees with different job  
21 duties and job titles. Document Request Number 4 and 6 [erroneously numbered 6 instead of 5]  
22 asks defendant to produce all documents pertaining to these differences. Document Requests  
23 Number 11 and 12 asks for all documents generally pertaining to meal and rest period policies.

24 17. Document Request Number 3 asks defendant to produce documents that  
25 demonstrate its "California-based non-exempt employees, other than PLAINTIFF, have been  
26 provided with state-mandated 30-minute meal breaks from September 2003 to the present."

27 18. Interrogatories Number 8, 9, 10, and 11 ask defendant to identify all differences in  
28 its overtime payment policies for employees with different job duties and job titles. Document

1 Request Number 7 and 8 asks defendant to produce all documents pertaining to these differences  
2 and Document Request Number 13 asks for all documents pertaining to overtime compensation.

3 19. Document Request Number 10 asks defendant to produce any and all employee  
4 handbooks that it distributed to its "California-based non-exempt employees that were in force  
5 and effect from September 2003 to the present."

6 20. Interrogatories Number 12 and 13 ask defendant to identify all payroll systems  
7 used to pay Spherion recruits from September 2003 to the present.

8 21. Document Request Number 15, 16, and 17 ask for all documents relating to any  
9 training Spherion gave to recruits from January 1, 2003 to the present pertaining to meal periods,  
10 rest periods, and overtime.

11 22. Document Request Number 18, 19, 20, and 21 ask for all documents pertaining to  
12 "studies" defendant has done since January 1, 2003 pertaining to meal periods, rest periods, and  
13 overtime.

14 23. To identify, review and gather all the different policies, procedures, handbooks,  
15 training materials, and other documents requested by plaintiff for thousands of employees with  
16 hundreds of different job duties and titles would require a tremendous amount of work. An  
17 inquiry would have to be made as to each client to determine the policies, practices, and  
18 procedures in operation on each individual project and assignment. To accomplish this task  
19 would require at least a three-step process and would require the involvement of at least three  
20 Spherion employees, not to mention the likely involvement of the client and/or its customers.

21 24. The first step would involve a human-resources ("HR") manager such as myself  
22 initiating contact with each branch office, licensee, or franchisee. The HR manager would have  
23 to communicate the nature and scope of the requests to each branch or office manager in  
24 California. The HR manager would then work with the branch or office manager at each  
25 location to identify the steps necessary to obtain the requested information.

26 25. The next step would require a branch manager, with the help of a branch-level  
27 employee (such as a Client Services Supervisor ["CSS"]) to generate a list of clients and  
28 accounts for the time period in question and to search for any responsive documents kept at the

1 branch office level, such as contracts, statements of work, and handbooks. Computers and hard-  
2 copy files for hundreds of customers would have to be searched and responsive documents  
3 would have to be copied or printed off computers.

4 26. The third step would require at least one CSS employee at each office location to  
5 inquire as to the policies, procedures, and practices applicable to each client/customer cite and/or  
6 each project or assignment. This would often require the CSS to reach out to the client directly  
7 to determine (a) what policies, procedures, and practices were observed on various projects and  
8 assignments and (b) what documents, if any, the client retained related to policies, procedures,  
9 and working conditions. In some instances, customers of the client may have to be contacted and  
10 asked to search for information and/or documents. Whatever information was gathered during  
11 this step, would have to be organized and sent to the HR manager for review.

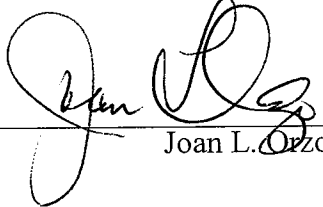

12 27. Each of the above steps will vary depending on the customer and the nature of  
13 the assignment. I estimate on average that an HR manager would spend 8 hours per each office  
14 location that it contacted as part of step one of this process. It is my understanding that there are  
15 over 50 office locations in California and an approximate salary for a typical HR Manager is \$41  
16 per hour. Thus, I would estimate the first step would take up to 400 hours and cost Spherion  
17 over \$16,000.

18 28. I estimate on average that an office/branch manager would spend 8 hours as part  
19 of overseeing the investigation and discovery involved with step two. It is my understanding that  
20 there are over 50 office locations in California and an approximate salary for a typical branch  
21 office manager is \$34 per hour. Thus, I would estimate the second step would take up to 400  
22 hours and cost Spherion over \$13,000.

23 29. I estimate on average that a branch CSS employee would spend 8 hours per client  
24 to search for information and documents as part of step number 3. It is my understanding that  
25 there are over 3,000 clients in California and an approximate salary for a typical CSS employee  
26 is \$22 per hour. Thus, I would estimate the third step would take up to 24,000 hours (or roughly  
27 480 hours for each CSS) and cost Spherion approximately \$528,000.

1           30.     The above estimates could easily be overrun because in many instances it will  
2 likely be more difficult and will likely take longer to locate documents. In situations where an  
3 assignment or project only lasted one day or in situations where a short-term assignment  
4 occurred several years ago, it may be very challenging to find documents and information related  
5 to that assignment. It may take several hours of investigation to find a particular client's contact  
6 information or the particular service contract or work order that applied to such a project. The  
7 recent acquisitions of several companies and the splintering of Spherion's business  
8 units/divisions will also likely create untold problems. Other difficulties will likely surface  
9 including: client businesses that are no longer operating, employees or managers who have  
10 contact information regarding clients but are no longer employed with Spherion, and documents  
11 or data that have been archived and are not easily accessible.

12           I declare under penalty of perjury under the laws of the State of California that the  
13 foregoing is true and correct. Executed on April 16, 2008, in Dallas, Texas.
